

Mohit Sharma

Philadelphia, PA 19104 / 971-379-4937 / mohitsharmamsh8@gmail.com / [linkedin.com/in/mohit-sharma-msh8](https://www.linkedin.com/in/mohit-sharma-msh8)

EDUCATION

Drexel University
Master of Science in Computer Science

Philadelphia, PA
(Expected: 2026)

Prestige Institute of Management
Bachelor of Finance

Dewas, MP, India
(Graduation Date: Jun 2021)

EXPERIENCE

Drexel University
AI Developer and Researcher

Philadelphia, PA
(Sep 2025 - Present)

- Built experiment/evaluation **workflows** (prompt versions, logging, error analysis) to track quality across model iterations.
- Implemented Python **services** for LLM-driven feedback generation + RAG grounding (FAISS/Chroma) to reduce unsupported answers.
- Shipped UI-triggered **features** (e.g., "AI Respond") by wiring frontend actions to backend inference + retrieval pipelines.

Handshake AI
AI Model Validator

Remote, US
(Sep 2025 - Present)

- Designed Tree-of-Thought and **multimodal** evaluations with clear constraints and objectively verifiable pass/fail criteria.
- Audited **agent workflows** (plan/code/tool use) to detect invalid shortcuts and improve evaluation validity.
- Evaluated **CAD**-focused visual-demonstration tasks by reviewing and scoring step-by-step completion quality in **KiCad** (schematics/PCB workflows) and **AutoCAD Mechanical** (drawings/BOM/annotations), ensuring outputs matched rubric requirements.

Alliant Infotech
Junior Software Developer

Indore, MP, India
(June 2022 - May 2024)

- Built and deployed full-stack web applications using **Python/Django** and **React**; developed REST APIs with **Django REST Framework (DRF)** following validation and security best practices.
- Delivered responsive UI features using **React** and improved cross-browser/mobile behavior with **HTML/CSS/Bootstrap**.
- Worked in Agile teams using **Jira + Git**; debugged production issues, managed DB migrations in **PostgreSQL**, and shipped iterative enhancements.

GeeksForGeeks
Software Developer Intern

Noida, India
(July 2021 - May 2022)

- Built responsive **web pages**/components using JavaScript/jQuery; optimized performance via debugging and compatibility testing.

PROJECTS

LLM Fine-Tuning Platform (**SageMaker-Style Prototype**) | github.com/mohit716/model-finetune-platform

- Built async fine-tuning jobs with FastAPI + Redis/Celery **orchestration** and metadata tracking (SQLite dev / PostgreSQL-ready).
- Implemented LoRA/PEFT **fine-tuning** (HF) with artifact storage (Local/MinIO S3) and inference endpoints; runnable via Docker Compose.

RAG Playground (Local-first AI Q&A) | github.com/mohit716/rag-playground

- Built a **local-first RAG** demo (FastAPI + ChromaDB + Ollama + React) supporting ingest + Q&A with source attribution.
- Used MiniLM embeddings with persisted vectors; configurable LLM selection via environment variables and documented setup/troubleshooting.

Multi-Agent Research Assistant | Streamlit deploy [link](https://github.com/mohit716/multi-agent-research) | <https://github.com/mohit716/multi-agent-research>

RetailFlow | 100k+ row e-commerce pipeline using Airflow, dbt, PostgreSQL, **BigQuery**, **Docker**, and Metabase. [Github](#)

CitiBike NYC Trip Analysis | Analyzed 3.2M+ rides with PySpark and MapReduce and **Pandas** to uncover trip, station, and ridership patterns. | Github

TECHNICAL SKILLS

Languages: Python, SQL, Java, JavaScript, C/C++

Frameworks/Platforms: Django, FastAPI, React, Apache Airflow, dbt, PySpark

Databases & Data: PostgreSQL, BigQuery, Pandas, Parquet

AI/ML: Hugging Face, LangChain, RAG, Chroma/FAISS, Claude API, Prompt Engineering, LLM Integration|

Tools: Docker, Git, Linux, GitHub Actions CI/CD, Jira, Streamlit, Microsoft 365, KiCad, AutoCAD Mechanical
